How it works

This is an international consultation led by teens in a dozen countries.
This is how it works:

- 1** The 4 themes and pictograms above are only examples, it's up to you to choose the themes of the consultation. Send us your list of **16 themes** by **14 December**.
- 2** You will receive an invitation to vote the top ten themes you would like to see included in the consultation – voting closes on **20 January**, so you have just one week to respond to the invitation and send us your votes.
- 3** All 16 themes in the final version of the “Have Your Say” poster will be announced on **4th of February**, on the occasion of **Safer Internet Day**, when children from different countries will work together to define objectives and strategies for each theme.
